## Degree Offered

- Bachelor of Science in Business Administration

## Nature of the Program

The accounting program has a rich heritage of producing successful accounting professionals and business leaders. Graduates excel in professional examinations, and we have a strong track record for graduate career placement. With an extensive alumni network and a solid reputation among major accounting firms, the accounting program at WVU has an excellent record of placing students in the accounting profession.

The accounting program at WVU has been separately accredited by AACSB International, the Association to Advance Collegiate Schools of Business, since 1997. As of November 2024, only 193 programs had achieved this distinction internationally. Accounting majors learn skills vital for every organization, from multi-national companies to government agencies and nonprofits. We provide the foundation you will need to enter the profession.

Accounting majors learn skills vital for every organization, from multi-national companies to government agencies and nonprofits. WVU provides the foundation graduates need to enter the profession with a heavy emphasis on performance measurement and accounting (data) analytics.

Our undergraduate program offers specialized tracks in the following areas:

- The CPA Exam grounded in the 2024 CPA Evolution (BAR, ICS, Tax).
- Corporate and organizational accounting with ties to the Certified Internal Auditor (CIA) and Certified Financial Management (CMA) exams.
- Data analytics and big data.
- Forensic accounting and fraud examination with ties to the Certified Fraud Examiners exam.

Undergraduate students can mix and match their accounting specialized tracks to set their career on a path to success.

We also offer an Accelerated Bachelor's to Master's (ABM) and a "3+1" program where advanced placement students earn both an undergraduate degree and either a Master of Accountancy (MAcc) or Master of Science in Forensic and Fraud Examination (MS-FFE) in approximately four years.

The faculty is comprised of twelve tenure-track faculty, two teaching scholar faculty, and two teaching instructor faculty.

Faculty members are actively engaged in the following goals as drivers for our strategic plan:

1. To strengthen the accounting pipeline through recruiting new students and through improved retention and persistence of existing students.
2. To excel in workforce readiness by embracing Assurance of Learning, curriculum enhancements, career placement, incorporating contemporary technology, and working with stakeholders.
3. To create knowledge through research through our doctoral programs and by our faculty.

The overarching goal of the accounting programs is to meet the evolving needs of its stakeholders through teaching, research, and service. The undergraduate accounting degree program builds upon a general education curriculum to provide students with a base of academic knowledge in business and accounting. It is designed to integrate basic knowledge with a professional orientation and form a foundation for future learning as well as career and academic success. The accounting program and course offerings are subject to periodic review for timeliness, professional requirements, and relevance in a global marketplace.

The advanced courses in the program provide both specialized knowledge in accounting, technology, and financial reporting and an integrated overview of the economic activities of a business entity. These courses give students the basic educational foundation required for a variety of entry-level positions in accounting, business, government, and not-for-profit organizations. Accounting graduates may pursue careers that lead to positions in public accounting, corporate finance, or government. Positions such as certified public accountants, financial planning and analysis, managerial accountants, controllers, chief financial officers (CFO), tax accountants, financial fraud examiners, forensic accountants, budget analysts, internal auditors, public administration officers, and even as chief executive officers (CEO) are occupied by graduates of our program.

The accounting major is also designed to give students the basic educational foundation necessary to prepare for the professional examinations that may be required of them in their careers. These examinations include those needed to become a Certified Public Accountant (CPA), Certified Management Accountant (CMA), Certified Fraud Examiner (CFE), and Certified Internal Auditor (CIA). Requirements to sit for the Uniform CPA Examination vary by jurisdiction, and students are encouraged to become familiar with the requirements of the jurisdictions where they plan to be certified. Many states, including West Virginia, require a bachelor's degree to sit for the exam and 150 semester hours of college credit to be licensed once the exam is successfully completed. The John Chambers College of Business and Economics offers a Master of Accountancy (MAcc) that helps students meet the professional certification requirement and prepare for the licensing exam while allowing students to earn a graduate degree. The John Chambers College also offers an innovative Master of Science in Forensic & Fraud Examination (MS FFE) and a graduate certificate in Forensic Accounting and Fraud Examination (FAFE), both designed to prepare entry-level accountants and others making career adjustments for forensic accounting and fraud examination careers.

## Major Learning Outcomes

### ACCOUNTING

The objective of providing a foundational education in accounting at the undergraduate level cannot be realized without appropriate curricula content, effective teaching, and ultimately, learning. Within the undergraduate accounting major, we subscribe to the following learning goals for each of our undergraduate students.

- Students will be competent in core technical areas.
- Students will apply current or emerging technologies to provide information for business decisions.
- Students will identify U.S. federal income tax issues for individuals and entities.
- Students will interpret professional standards.
- Students will identify the effect of regulatory and ethical issues on the practice of accounting.
